

Neue Wege der digitalen Partizipation:

CONSUL

-

**Freie Software für
selbstbestimmte Städte**

Wer steht dahinter?

- Protestbewegung 2011/12
- Bürgerplattformen stellen Bürgermeister in Madrid, Barcelona etc
- Entwickeln Consul für bessere Bürgerbeteiligung als Open Source
- Ab 2017 großflächige Verbreitung inkl lebendiger Community

Warum Consul?

- ▣ Frei und kostenlos (Open-Source)
- ▣ Anpassbar auf Bedürfnisse der jeweiligen Stadt (mit einem Mausklick können Instrumente zu- oder abgeschaltet werden)
- ▣ Sicher + Fokus auf Privatsphäre
- ▣ Ständige Weiterentwicklung

Was kann Consul?

- Alle Beteiligungsinstrumente, die weltweit genutzt werden, können eingerichtet werden
- Bürger*innen können bei wichtigen und alltäglichen Entscheidungen teilhaben
- Hohe Funktionalität: Bürger*innen können sich problemlos auf verschiedenen Ebenen beteiligen
- Adaptive Design: Webbrowser + mobile Endgeräte
- Effizienz: kleine Teams für die Verwaltungsarbeit

Welche Instrumente?

- Debatten
- Bürgervorschläge
- Abstimmungen
- Bürgerhaushalt
- Kollaborative Gesetzgebung
- → Alles weitere integrierbar bzw auf die Bedürfnisse der jeweiligen Stadt anpassbar

Metro at night (on weekends). Is it positive?

3 comments • 2018-11-29 • admin

This is a debate that has been going on for a long time and it is the possibility of opening the metro on weekends at night. It would be important to know if it is a positive measure or too expensive for what it reports to the city.

Would it be okay if the city surrounded itself with a green belt by the highway?

in - 2018-11-29 - 3 comments -

The most powerful CO2 sinks and pollution filter are forests and trees. Surrounding ourselves with autochthonous vegetation by taking advantage of the margins and slopes of the ring roads would be a good way to counteract the emissions produced on these roads. It would give more environmental quality to the city and mitigate heat waves, improve air quality, and restore nature, among other benefits.

There are people who think that this is too expensive and it would be better to look for other ways to reduce emissions. What do you think?

Refurbishment of the North Square

Decided now what the Town Hall is going to do with this square.

This is one of the 10 squares that have been selected for a possible remodeling to improve its use for the population. There has been a participatory process that ends now in this final phase of voting. It decides with respect to the squares if they should be remodeled or not, and for those that mostly decide to remodel which will be the projects to carry out.

More information

More Information

The North Square aims to become a hub of attraction for the district and for the population that may come from other parts of the city, as it has optimal regional accessibility in public transport.

It comes from an order of the Plan of 1985, with the aim of consolidating a built residential front to the new park and accommodate uses to serve as a connection between the old and the new.

The plot is intended for sports use and green area, but currently has a large vacant area that requires rethinking under a new perspective to take advantage of position and generate a pole of attraction towards the district, is intended to create a new square as a venue for cultural events and social meetings that is one of the most obvious deficiencies in the districts of the periphery.

Light of the City

Square 1

'Light of the City' responds to the will of the citizens to create a centrality in the district, through a new public space: the civic square. The proposal must respond to very different situations from the most technical point of view: topography, roads, accessibility...even the most social. For this reason, 'Light of the City' is understood as an integrator, an element in which to converge. Urban integrator: the new square is the point of connection of the great green extension of the park with the most consolidated and dense part of the district. In addition to the opportunity to continue an important point of public transport connection. Social integrator: the identity of a neighborhood is nourished by the neighborhood association and the sense of belonging to a place. The social diversity present in the district needs a place like the new civic

Square with History

Square 1

The identification of an urban image in an area must be worked on, reading pre-existences and placing new elements that endow it with character. Citizens must identify these urban elements as their own in the civic square. The project tries to bring together the needs of a population and its relationship with the city. A social reference of appropriation of public space. An attempt is made to set up a meeting place and enjoy the district's own activities, increasing urban quality, especially the network of bordering spaces. The bases are raised to achieve over time a new area of centrality through the realization of a 'square equipped' that one of the most important milestones of use of the district. This is where the importance of degenerating activity in the square lies, taking advantage of the efficient value of the itineraries that run through it and activating it through the

Air Quality and Climate Change Plan

SHARE

DESCRIPTION

One of the main responsibilities of city councils is to look after the health of their citizens, implementing actions aimed at reducing risk situations and, among them, preventing climate change and monitoring and improving the quality of the air we breathe.

The reduction of air pollution and the fight against climate change must not be delayed, given that air pollution in cities is already the fourth cause of premature death in the world, according to a report published by the World Bank last September, and that cities are also important emitters of greenhouse gases.

In the City Council we are working so that next year we have an Air Quality and Climate Change Plan that responds to these needs. Right now we are defining thirty proposals in collaboration with neighbourhood and social organisations, technicians, administrations, academic institutions, social and trade associations and collectives, trade unions, business organisations and political groups. At the same time, we want our neighbours to be able to get to know them.

Now is the time for you to tell us here how you think these measures would work in your street, in your neighbourhood, in your district.
